Codestone

General

ü **STABILITY** – We test CSMail with a total of nearly 4 gigabytes of data before every release – no matter how minor. That's over 20,000 messages and 60,000 attached files.

ü **FREE UPGRADES** – Buy CSMail now and you'll get free upgrades to all future versions of the product.

ü **FREE TECHNICAL SUPPORT** – Free, unlimited email product support.

ü **ROYALTY FREE RUN TIME** - Distribute the library with your application with no royalty fees.

ü **EASY REDISTRIBUTION** – Support for the VB Setup Wizard, no dependent DLLs, Self Registration -we've worked hard to make redistributing the components as straightforward as possible.

ü **MESSAGE-CENTRIC STRUCTURED DESIGN** – We started with MIME specification when we designed this library – so you get a rich Message Object Model with cohesive POP3 and SMTP clients.

ü **.NET INTEROP ASSEMBLY** – Pre-built interop assembly included in the distribution.

SMTP Client Object

ü **BUILT-IN PROXY SERVER SUPPORT** - The SMTP Client object has full internal support for SOCKS 4, SOCKS 5 and standard SMTP proxies.

ü **ESMTP AUTHENTICATION** - Full support for AUTH LOGIN for SMTP servers outside of your domain.

ü **STANDARD MIME ENCODING** – 7Bit, Quoted-Printable and Base64 encoding all selected automatically by the component – you just attach a file and we do the rest.

ü **OTHER ENCODING SUPPORT** – You can manually override the automatic encoding with any of the standard encoding methods or with Uuencoding and 8 Bit encoding.

ü **SMTP ENVELOPE** – Directly access the SMTP envelope to override the recipient and originator fields in the message.

POP3 Client Object

ü **BUILT-IN PROXY SERVER SUPPORT** - The POP3 Client object has full support for SOCKS 4, SOCKS 5 and standard POP3 proxies.

ü **AUTOMATIC MIME TRANSFER DECODING** - The POP3 Client will automatically decode 7Bit, 8Bit, Quoted-Printable, Base64, and Uuencoded files.

Message Object

ü **PROPERTIES FOR QUICK ACCESS TO COMMON MIME HEADERS** – TO, CC, BCC, From, ReplyTo, Sender and Subject fields all exposed as properties for quick access.

ü **FULL ACCESS TO ALL MIME HEADERS FOR ADVANCED DEVELOPERS** – Access to each and every MIME header gives you unlimited flexibility.

ü **FULL SUPPORT FOR MULTIPART MESSAGES** – Rich support for MIME sections for complex message structures.

ü **RFC 2047 INTERNATIONAL HEADERS** – Buonas Díaz! – Internationalized text in your message headers!
